FORWARD-LOOKING STATEMENT

- **Forward-Looking Statement** This presentation contains certain statements that may constitute forward-looking information under applicable securities laws. All statements, other than those of historical fact, which address activities, events, outcomes, results, developments, performance or achievements that C3 Metals anticipates or expects may or will occur in the future (in whole or in part) should be considered forward-looking information. In some cases, forward-looking information is identified by the use of terms and phrases such as “anticipate”, “believe”, “could”, “estimate”, “expect”, “intend”, “may”, “plan”, “predict”, “project”, “will”, “would”, and similar terms and phrases, including references to assumptions. Such information may involve, but is not limited to, comments with respect to strategies, expectations, planned operations or future actions. These forward-looking statements are based on currently available competitive, financial and economic data and operating plans as of the date of this presentation but are subject to known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements or industry results to be materially different from those expressed or implied by such forward-looking information. Such factors are based on information currently available to C3 Metals, including information obtained from third-party industry analysts and other third-party sources, and are based on management’s current expectations regarding future growth, results of operations, future capital (including the amount, nature and sources of funding thereof) and expenditures. The forward-looking information contained in this presentation is expressly qualified by this cautionary statement
- A number of risks, uncertainties and other factors could cause actual results to differ materially from the results discussed in the forward-looking information, including, but not limited to, the following: risks associated with reliance on key personnel; financial health of C3 Metals’ and its related cash flows; general industry and market conditions and growth rates; failure to realize anticipated benefits of acquisitions and monetization opportunities; legislative and regulatory developments; reliance on major customers; general economic conditions and levels of economic activity including interest rate and currency exchange rate fluctuation; current global financial conditions; failure to realize on growth initiatives; financing risks; degree of competition in the industry; risks associated with the development of projects; changes in employee relations; control of costs and expenses including inability to repay maturing debt and to fund capital expenditures and future acquisitions and dependence on information systems and technology; retaining main customers risk.
- Forward-looking information reflects C3 Metals’ current beliefs and is based on information currently available to C3 Metals and on assumptions it believes to be reasonable. In some instances, material factors or assumptions are discussed in this presentation in connection with statements containing forward-looking information. Such material factors and assumptions include, but are not limited to: the Company’s ability to execute on its business plan; the continued success of business development activities; new assets or projects will continue to be added to the Company’s portfolio. The forward-looking information is made as of the date of this presentation and C3 Metals assumes no obligation to update or revise such information to reflect new events or circumstances, except as may be required by applicable law. Because of the risks, uncertainties and assumptions contained herein, prospective investors should not read forward-looking information as guarantees of future performance or results and should not place undue reliance on forward-looking information. Nothing in this presentation is, or should be relied upon as, a promise or representation as to the future.
- There is no warranty or guarantee given by any person as to any forecast or financial outlook contained herein. In addition, such forecasts and financial outlooks reflect various assumptions by C3 Metals. Although C3 Metals believes these assumptions to be reasonable, C3 Metals can give no assurance that such assumptions will prove to be correct and readers are cautioned that such assumptions may prove to be incorrect. The actual results achieved will vary from the forecast or financial outlook results and the variations may be material. There is no guarantee that any forecasts or financial outlooks will be achieved in whole or in part. To the extent any forward-looking statements contain forecasts or financial outlooks, such information is being provided solely to enable a reader to assess C3 Metals’ financial condition and its operational history and experience in the resource exploration industry. Readers are cautioned that this information may be not appropriate for any other purpose, including investment decisions.
- Industry and other statistical data presented in this presentation, except where otherwise noted, have been compiled from sources and participants which, although not independently verified by C3 Metals, are considered by C3 Metals to be reliable sources of information. References in this presentation to research reports or to articles and publications should be not construed as depicting the complete findings of the entire referenced report or article.
- Data for the Jasperoide Project was retrieved from Hochschild Mining’s database and internal reports. Hochschild was operator on the Jasperoide project from 2011 to 2012 and completed 2 drill Programs. C3 Metals had access to the entire drill database and was confident that the reporting of the information was to industry standard practice. The Company has not completed sufficient work to verify all the historic information on the Jasperoide Project.
- The Qualified Person responsible for the technical information in this presentation is Stephen Hughes P. Geo., C3 Metals’ Vice President Exploration, who has approved the technical information included herein. Any reference to historical estimates and resources should not be relied upon. These are not current and a Q.P. has not done sufficient work to classify these historical estimate and C3 Metals Inc. is not treating the historical estimate as a current resource estimate.

¹ Copper equivalent (CuEq) calculation is for reporting purposes only and was determined based on $\text{CuEq (\%)} = \text{Cu (\%)} + ((0.7079 \times \text{Au g/t}) \text{ under metal price assumptions of Copper - US\$3.00/lb, Gold - US\$1,800/oz. As the Bellas Gate project is an early-stage exploration project and there is insufficient metallurgical data to allow for estimation of recoveries, porphyry copper-gold recoveries are estimated based on multiple comparable porphyry-style copper-gold deposits (Alumbrera, Batu Hijau, Fish Lake, Mt Milligan, El Pachon, Agua Rica, Cerro Casale and Skouries) which averaged 90% recovery for copper and 73% for gold. A nominal cut-off of 0.2% CuEq is used for the reporting of potentially significant intercepts and higher-grade cut-offs are 0.4% CuEq$

C3 METALS' BUSINESS STRATEGY

VISION

C3 Metals is focused on the discovery and development of large copper/gold deposits through safe, environmentally sound, community-focused, ethical and legal mineral exploration and development.

1

STEP 1

Set Up Discovery Stage

- ✓ Secure district-scale opportunities for meaningful copper/gold deposit discoveries
- ✓ Rate and rank exploration targets
- ✓ Secure capital to fund exploration programs
- ✓ Discovery phase holds the potential for the highest return on investment

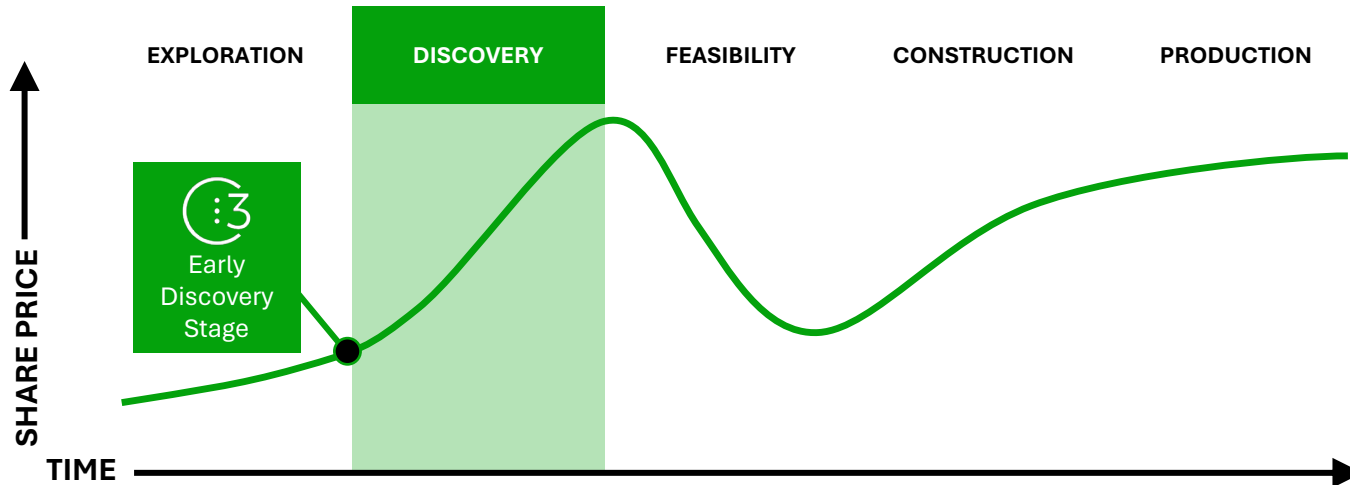

2

STEP 2

Managing Risk

- ✓ Risk vs. reward assessment for optimal return on investment
- ✓ Create and maximize portfolio optionality
- ✓ Evaluate strategic investments, partnerships, business transactions, etc.
- ✓ Razor-sharp focus on stakeholder relations/communication

LIFECYCLE OF A JUNIOR MINING COMPANY*

* Life cycle of a Junior Mining Company chart is conceptual in nature and not intended to be relied upon.

Why Copper?

Copper – Growing Demand & Constrained Supply

Growing Demand

Electric vehicles (EVs):

+5x copper vs gas vehicles
~40% of the green copper demand by 2030

up to 25kg copper used in charging ports

4.6t Cu/MW in solar powered systems

4.7t Cu in 3MW wind turbines

Up to 0.7kg/kWh in a lithium-ion battery

Demand Exceeds Supply

The growing copper demand outweighs the global copper supply.

By the end of the decade a significant **supply of new copper production** is needed to fill the supply gap.

Source: Chart – Bloomberg, Wood Mackenzie, RBC Capital Markets estimates

Supply Constraint Directly Related to Lack of Investment

Significant capital continues to flee global specialist mining funds

From 2011 to present: MSCI World Mining Index & Van Eck Gold Miners Index **dropped 31% and 60%**
 Mining specialist capital dropped **60% in UK and 80% in Canada**

Our Goals & Objectives

Initial Discovery Goals and Objectives

Initial Discovery Goal

Market value assuming price/lb of Cu in the ground:

Price / lb of Cu in the ground	US\$ Market Cap	C\$ Market Cap at 1.35 FX rate
US\$0.05	US\$110M	C\$148M
US\$0.07	US\$154M	C\$208M
US\$0.10	US\$220M	C\$297M

Discovery Objectives

Delineate 1Mt of contained copper as quickly as possible for as little capital investment as possible with as little equity dilution as possible.

Must achieve this through **safe, environmentally sound, ethical, stake-holder focused, legal mineral exploration.**

If we achieve **Initial Discovery Goal**, move to **PEA stage** while continuing exploration on other prospects.

PARTNERING with RCF FOUNDATION & NINE MILES OF SMILES

Launching Partnership Program in 2024

COMMUNITY HEALTHCARE PARTNER

- Nine Miles of Smiles (NMS) is a non-profit volunteer organisation that provides free dental care to underserved areas in Jamaica.
- **Our goal is to work together and launch a sustainable program in isolated communities in proximity to C3 Metals' projects.**

GRANT APPROVED

- RCF Foundation approved NMS grant application for US\$25,000.
- C3 Metals to also make a US\$10,000 contribution, bringing the total to US\$35,000.

ADDITIONAL C3 METALS CONTRIBUTIONS

- In-kind donations of the use of our facilities and resources
- Donation to update the existing NMS web presence (website and social media outreach)

JAMAICAN MINERAL SECTOR IS SEEKING INVESTMENT IN METALLIC MINERALS

The screenshot shows the website for the Mines and Geology Division. The header includes the division's logo and name. The main content area describes the Economic Geology Unit's role and lists its activities, with two specific points highlighted in green boxes. The first point is about identifying and evaluating the potential of gold, silver, copper, nickel, and lead. The second point is about promoting investment in non-bauxite metallic minerals to diversify the sector.

MINES AND GEOLOGY DIVISION

The Economic Geology Unit is responsible for the identification and evaluation of Jamaica's mineral resources as well as making recommendation for their economic exploitation.

The activities of this unit includes:

Metallic Minerals

The sub-units activities include:

- The identification and evaluation of the precious and base metal potential (gold(Au), silver(Ag), copper(Cu), nickel(Ni), lead (Pb)) of the island.
- To generate a comprehensive metallic mineral database of the island with emphasis on its application to mining and environmental management, epidemiology and agriculture.
- To promote and encourage investment in non-bauxite metallic minerals as a means of diversifying the minerals sector.

- Opportunities include:

 - If we consistently see $>0.5\%$ CuEq¹ in the upper part of the system, grade potential is very high at depth
- Risks include:
 - Could be too deep?
 - Could be offset/dismembered by fault?
 - Could be stoped out?

Notes:

1. The Mineral Resource estimate has an effective date of 1 May 2023 and the estimate was prepared using the definitions in CIM Definition Standards (10 May 2014).
2. The CCPS used to calculate the Mineral Resource estimate uses a copper price of \$3.75/lb, a copper recovery of 75%, an open pit mining unit cost of \$2.35/t, processing costs of \$4.66/t and G&A cost of \$1.37/t. The breakeven cut-off grade using these parameters is 0.14% copper.
3. Mineral Resources are reported in relation to a CCPS in order to demonstrate reasonable prospects for eventual economic extraction, as required by the definition of Mineral Resource in NI 43-101; mineralization lying outside of the pit shell is excluded from the Mineral Resource. Potential revenue from gold was not considered for the development of the constraining pit shell; the Mineral Resource estimate is not dependent on recovering gold.
4. The quantity and grade of reported Inferred Mineral Resources in this estimate are uncertain in nature and there has been insufficient exploration to define these Inferred Mineral Resources as Indicated or Measured Mineral Resources.
5. All figures are rounded to reflect the relative accuracy of the estimate and therefore numbers may not appear to add precisely.
6. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.
7. The Mineral Resource estimate is prepared by IMC of Tucson, AZ, under the direction of Michael G. Hester, FAusIMM, a Qualified Person.

PARALLEL PORPHYRY, SKARN & EPITHERMAL MINERALIZED BELTS

KHALEESI BELT

JASPEROIDE BELT

Nested & Near Surface Copper-Gold Porphyry, Skarn & Epithermal Deposits

Copper and Gold-Rich Hydrothermal Fluids “Punch Through” or “Migrate” along the Jasperoide Thrust Faults, Two Systems Appear Spatially Associated

KHALEESI PROJECT

Skarn, Epithermal and Porphyry Mineralization at Surface

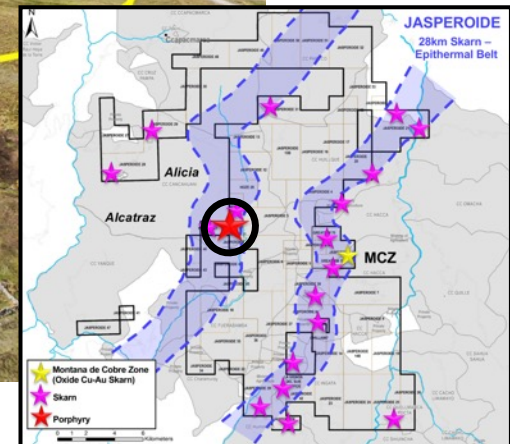

Epithermal quartz breccia assayed 2.60% Cu, 6.0g/t Au

Skarn with bornite assayed 2.61% Cu, 0.11g/t Au

Phyllic altered diorite porphyry assayed 1.41% Cu and 0.98g/t Au

C3 METALS: Land Packages Put Together. Time to DRILL!

Current market cap of ~C\$30M

Up to 20,000m drilling planned
in Jamaica in 2024
(results dependent)

Jamaica: At least 16 porphyry and
40 epithermal targets over 30km
strike extent

Maiden resource in Peru underpins
value and protects downside

Peru offers exposure to large,
strategic concession package in
world-class, copper-gold district
